PROFESSIONAL SUMMARY

Senior Software Engineer with over 5 years of experience delivering high-performance web and mobile architectures using React, React Native, and Node.js. Specialized in the end-to-end development of FinTech and EdTech platforms, from initial architectural design to API schema definition and CI/CD deployment. Expertise in building lightweight, data efficient systems for international markets, evidenced by leading technical delivery for Ransact and the Nigerian Nursing Success platform.

CORE TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Node.js (NestJS/Express), PHP, HTML5, CSS3/SCSS

Frontend & Mobile: React, React Native, Next.js, Vite, Tailwind CSS, Bootstrap, Material UI (MUI)

Backend & Cloud: Firebase (Firestore, Auth, Functions), RESTful APIs, API Schema Design, Azure DevOps, PostgreSQL

Tools & Engineering: Git, CI/CD Pipelines, Figma, Unit/E2E Testing (Jest), Component-Driven Design, Performance Optimization

PROFESSIONAL EXPERIENCE

HEAD OF FRONTEND & MOBILE | RANSACT - 2025 – 2026

- Architected and deployed a production-ready mobile and web experience from scratch within 6 months, serving as the technical lead for the frontend stack.
- Reduced application bundle size by 40% through modular architecture and tree-shaking, ensuring sub-2 second load times on 3G networks.
- Engineered a proprietary library of 30+ reusable UI components, maintaining 100% visual consistency and reducing feature development time by 25%.
- Integrated secure, real-time FX transaction flows and payment gateways, maintaining 99.9% system uptime since launch.
- Collaborated with backend engineers to define API schemas for Node.js services, optimizing data transfer efficiency for cross-border payments.

FRONTEND DEVELOPER | KNOWLEDGE CITY (FINTECH/EDTECH) - 2025 – 2026

- Built a core e-learning engine with complex "Backpack" and course management features using Next.js, serving an active student base.
- Developed a gamified "Coin System" for reward management, processing real-time student transactions with 100% data integrity.

- Utilized Firestore for real-time data synchronization, providing immediate feedback for quizzes and learning diary updates.
- Partnered with product teams to refine UI/UX, achieving a measurable reduction in friction during the user onboarding process.

LEAD DEVELOPER | NIGERIAN NURSING SUCCESS (PROJECT-BASED) - 2024 – 2026

- Designed and launched an EdTech assessment platform used by 1,000+ nursing students to prepare for professional examinations.
- Engineered a rigorous automated scoring engine with randomized question banks, reducing manual grading efforts by 100%.
- Developed internal administrative dashboards to manage secure exam audit logs and track individual student performance analytics.
- Managed the full project lifecycle from requirement gathering to deployment on Vercel and Firebase.

FRONT-END DEVELOPER | DROID TECHNOLOGIES (REMOTE) - 2024 – 2025

- Consulted for 3+ enterprise-scale clients to deliver high-impact digital applications within strictly defined project timelines.
- Packaged 20+ UI elements into private npm repositories using Azure Feeds, increasing frontend developer velocity by 30%.
- Managed version control and package distribution across distributed teams using Azure Repos and professional CI/CD workflows.
- Conducted 50+ technical code reviews to ensure adherence to TypeScript best practices and maintain 90%+ code coverage.

FRONT-END DEVELOPER | DIOCESE OF CALABAR (REMOTE) - 2023 – 2024

- Developed an official institutional website using SCSS and modular JavaScript, improving page load performance by 50% through asset compression.
- Integrated SEO enhancements that resulted in a measurable increase in search visibility and organic reach within the first 6 months.
- Partnered with communications teams to standardize digital branding across all responsive layout modules.

FRONT-END DEVELOPER | AYF CALABAR (REMOTE) - 2023 – 2024

- Built a real-time member registration portal serving 300+ active users using Firebase and responsive design principles.
- Managed full deployment on Firebase Hosting, ensuring 99% uptime and consistent version tracking for registration content.

WEB DEVELOPER | GOALS AFRIKA - 2020 – 2022

- Refactored legacy codebases into modular architectures, reducing technical debt and improving site speed by 35%.
- Implemented modern SEO best practices that increased organic traffic to the platform by 28% within six months.

ICT ASSISTANT / WEB SUPPORT | LEADPAC FOUNDATION - 2019 – 2022

- Maintained organizational websites with 99.9% uptime and assisted with domain migrations and internal workflow documentation.

TECHNICAL PROJECTS

- Nigerian Nursing Success: EdTech exam portal with automated assessments and randomized logic; built with React, Vite, and Firebase.
- Drop Img: Fast, anonymous image hosting service; improved load times by 40% using TypeScript, React, and Cloudinary.
- TaskFlow: Intelligent task management application with custom automated prioritization rules; built with React and Vite.
- Nursing Quiz App (UNICAL): Secure assessment app with randomized questions and real-time scoring using Express and Firebase.
- CGPA Calculator: Mobile-friendly web application for real-time academic calculations with offline data persistence; built with TypeScript.
- Knowledge City (Collaborative): E-learning platform featuring backpack and coin systems; built with Next.js and Firebase.
- Diocese Of Calabar Web: Official platform with events and news resources; built with TypeScript and Express.
- D'roid Technologies Ltd Site: Official company profile and service showcase; built with React and Firebase.
- AYF Calabar Portal: Member management system using Firebase and Google Sheets App Script integration.

EDUCATION

B.Sc. Computer Science | University of Cross River State (UNICROSS) | 2020 – 2025

COMMUNITY & OPEN SOURCE

- Active contributor to React.js and TypeScript repositories; author of multiple reusable frontend snippets and accessibility components.
