

ONYEKACHI GOD'SWILL RICHARD

Front-End Developer | React.js | TypeScript | Modern Web Experiences

Calabar, Nigeria | mail.ricx@gmail.com | +234 810 079 0074

Portfolio: <https://www.onyekachi.dev> | GitHub: <http://github.com/kachiDeGreat>

PROFESSIONAL SUMMARY

Versatile Front-End Developer with over 5 years of experience creating responsive, accessible, and performance-driven web applications. Skilled in React.js, TypeScript, JavaScript, and Tailwind CSS, with a strong eye for UI/UX design and scalability. Adept at building everything from fast institutional websites to dynamic, data-driven web apps. Passionate about clean code, problem-solving, and delivering seamless digital experiences for businesses and users alike.

CORE TECHNICAL SKILLS

- Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS
- Frameworks & Libraries: React.js, Next.js, Tailwind CSS, Bootstrap, jQuery
- Backend & APIs: Firebase, Node.js, Express.js, REST APIs, GraphQL
- Tools & Platforms: Git, GitHub, Netlify, Vite, Webpack, Render
- Testing & Optimization: Chrome DevTools, Lighthouse, Jest, SEO Optimization
- Design & Workflow: Figma, Jira, Notion, Trello, Agile/Scrum Collaboration
- Best Practices: Responsive UI, Accessibility (WCAG), Performance Optimization, SEO, Cross-Browser Compatibility

PROFESSIONAL EXPERIENCE

- Front-End Developer | Droid Technologies (Remote) — 2024 – Present
 - Built and maintained scalable web applications using React.js, TypeScript, and Pure CSS, improving load times by 30%.
 - Developed reusable component systems, cutting development time by 25% and improving consistency across projects.
 - Collaborated with backend and design teams to deliver high-performing user interfaces aligned with agile sprint goals.
 - Implemented SEO and accessibility standards, achieving 95+ Lighthouse scores for performance and UX.

- Front-End Developer | Diocese of Calabar – Anglican Communion (Remote) — 2023 – 2024
 - Designed and developed the official institutional website using HTML, JavaScript, and SCSS with a fully responsive layout.
 - Improved page load performance by 50% through code optimization and image compression.
 - Collaborated with communications teams to ensure consistent branding and content structure.
 - Integrated SEO enhancements to improve visibility and search ranking.
- Front-End Developer | AYF Calabar (Remote) — 2023 – 2024
 - Built a real-time member registration and content portal using Firebase and JavaScript, serving 300+ active users.
 - Implemented responsive layouts, SEO-friendly structures, and accessibility compliance.
 - Managed deployment on Firebase Hosting, ensuring uptime and version tracking.
- Web Developer | Goals Afrika — 2020 – 2022
 - Refactored legacy code into modular JavaScript and SCSS, reducing load times by 35%.
 - Designed responsive layouts and modern UI patterns to enhance usability and design consistency.
 - Implemented SEO best practices, increasing organic traffic by 28% within six months.
- ICT Assistant / Web Support | Leadpac Foundation — 2019 – 2022
 - Provided routine updates and front-end maintenance for organizational websites, achieving 99% uptime.
 - Assisted with domain management, hosting migration, and workflow documentation.
 - Supported digital content updates and ensured UI consistency across departments.

EDUCATION

- B.Sc. Computer Science — University of Cross River State (UNICROSS) | 2020 – 2025

PROJECTS

- DropImg (React + Firebase + Tailwind CSS)

- Built a lightweight image hosting platform for anonymous uploads with auto-generated links.
- Improved image load times by 40% through optimized Firebase Storage queries.
- Knowledge City (React + Firebase + Paystack)
 - Developed an e-learning web app featuring coin-based payments, course modules, and Firestore integration for real-time updates.
- AYF Calabar Web Portal (HTML + Firebase)
 - Created a multi-step registration form and blog system, boosting member engagement by 3× through responsive design and real-time data handling.
